

**DIJIL M P**  
Test Engineer  
ISTQB Certified

Phone No.: +91-9747611955  
E-mail: dijilmpkovoov@gmail.com

## CORE COMPETENCIES

*Software Testing*

*Defect Management*

*CAN, UDS Protocols. DSPACE, MATLAB*

*QA Plan & Strategy Implementation*

*Functional/ Regression Testing*

*Agile & Waterfall Methodology*

*Automation/ Manual Testing*

*HIL Testing, Test Script Automation*

*UAT, PREEVision*

*Test Manager*

*Client/Stakeholder Management*

## EDUCATION

**2017: B.Tech. (Electrical and Electronics Engineering)** from Govt. College of Engineering, Kannur University; secured 69%

**2013: 12<sup>th</sup>** from KPCHSS Pattannur, State Board; secured 92%

**2011: 10<sup>th</sup>** from KPCHSS Pattannur, State Board; secured 88%

A multi-faceted professional, targeting leadership roles which involve professional growth & opportunities in **Software Testing Lifecycle/ Automotive Embedded Testing** with an organization of repute

**Location Preference:** Bengaluru

## PROFILE SUMMARY

- A result-oriented professional; offering **7 years** of experience in **Software Testing Lifecycle** across automotive domain
- Previously associated with **UST Global Pvt. Ltd., Robert Bosch India and Mercedes Benz Research and Development** as **Test Engineer**
- **Broad-based expertise** in System Testing, Software Testing, Black Box Testing, Regression Testing, **HIL Testing, ADAS, and SIL Testing**
- Skilled in:
  - **CAN, UDS, Flexray, LIN, Vector CANoe, DSPACE, PROVETECH,**
  - **MATLAB ,Configuration Desk and control desk**
  - **RQM Tool, Doors, CQ, ALM**
  - **C Programing Basics, CAPL Scripting**
  - **VB Scripting**
  - **CANoe Restbus simulation generation**
  - **BROP Testing [ Diva, MONACO, NEST,GTNTS,DWT]**
  - **Modules: COM, GTS, EIS**
  - **Customer specific test responsible for Mercedes Benz**
  - **K-HIL Testing for Electronics Ignition Switch**
  - **Test manager and Defect manager for Door Module ECU**
  - **Validation Responsibility for ACU (Advanced Camping Unit ECU)**
- **SIL Testing** experience in ADAS project
- Experienced in ADAS, **RQM** and **Visual Studio Tools**
- Experience in handling CANoe Restbus generation using DIAMLER Tools and CAPL scripting
- Experience in handling Customer specific (**Mercedes Benz**) tests like **MONACO, OTX, DIVA, GTNTS, DWT, NEST** etc.
- Functional responsible for **BROP Teting**
- Active participation in SRS review and test specification updates, Test case writing
- **Designing & executing test plans** and gap analysis to ensure that business requirements and functional specifications are tested and fulfilled; generating Unit Test Defect / Review Reports
- **Automate Test cases with VB Scripting for Provotech in Benz**
- Managing the **Software Testing Process** i.e., Requirements Gathering, Test Planning, Test Estimation, Reporting involving creation of test plans/ cases/ scenarios and ensuring smooth test execution
- **An effective communicator** with excellent, organizational, analytical and team building skills with the capability to relate to people at any level of business and management
- **Performed MATLAB/Simulink modeling for integration with dSPACE Configuration Desk and Control Desk**

## WORK EXPERIENCE

01

**Bosch Global Software Technologies, Bengaluru**  
**Test Engineer**

**2019 April To 2023 Oct.**

### Key Result Areas:

- Managing various technical aspects like software scheme design, coding of modules, monitoring critical paths & taking appropriate actions
- Establishing & enforcing Standard Test Processes & Deliverables (including Defect Management and Quality Metric Reporting) within the gated process to streamline testing and support automation/manual testing efforts

PERSONAL DETAILS

Date of Birth: 14<sup>th</sup> September 1995

Languages Known: Malayalam, English, and Hindi

Permanent Address: Kannur, Kerala, India

- Rendering assistance in analysis of Business/System Requirements Documents and Use Cases, RTM, Test Planning, Effort Estimation, Task Allocation, Monitoring, & Reviewing Escalation, Prioritization, Test Scripting, Test Execution, Defect Identification & Management, Reporting, and preparation of Test Summary Report
- Assigning work to team members, monitoring their performance, and delivering outstanding results through coaching, direction, and recognizing QC team members
- Reviewing project test and implementation schedules; monitoring, documenting & reporting the current status of defects for each testing cycle and overall project to senior management
- Supervising onsite/ offshore QA resources for ensuring timely project completion; developing quality standards in the initial software development stages and enhancing the existing QA plan & strategy
- Designing the test strategy & plan for all projects; conducting review activities such as Requirements Review, Design Review, Test Strategy Review, and Test Case Review
- Rendering assistance in analysis of Business/System Requirements Documents and Use Cases, RTM, Test Planning, Effort Estimation, Task Allocation, Monitoring, & Reviewing Escalation, Prioritization, Test Scripting, Test Execution, Defect Identification & Management, Reporting, and preparation of Test Summary Report
- Designing the test strategy & plan for all projects; conducting review activities such as Requirements Review, Design Review, Test Strategy Review, and Test Case Review

02 Mercedes Benz Research and Development, Bengaluru 2023 Oct  
Test Engineer

Key Result Areas:

- Worked as Test Manager and Defect Manager for Door Module ECU validation projects
- Managed and resolved defects related to Power Window Lifter and Outside Mirror systems.
- Performed Component HIL validation for Electronic Ignition Switch (EIS) ECU.
- Worked as a Validation Engineer for Advanced Camper Unit ECU.
- Developed Test Specifications and Test Scripts using ProveTech with dSPACE HIL platform.
- Ensured timely defect closure, performed root cause analysis, and maintained proper defect lifecycle documentation
- Executed various BROP-level tests, including NTS and DWT

KEY PROJECTS

1. Project Title: ORC (Airbag) Software Development for Mercedes Bens  
Team Size: 20

Bosch

Role: Test Engineer

Highlights:

- Prepared the environment for HIL runs
- Performed testing and recorded the result and monitored the HIL runs for errors
- Write small CAPL Program for CANoe simulation
- Executing Customer specific (Mercedes Benz) tests like MONACO, OTX, DIVA, GTNTS, DWT, NEST etc.
- CANoe Rest bus generation using DIAMLER Tools and CAPL scripting
- Prepared and documented detailed Test Specifications based on system and software requirements
- Participated in Change Request (CR) meetings, analyzed impact on validation scope, and updated test documentation accordingly

## 2. Project Title: HIL Validation of Electronics Ignition Switch (EIS)

**Team Size:** 8

Mercedes Benz

**Role:** Test Engineer

### Highlights:

- Prepared the environment for dSPACE HIL runs
- Performed MATLAB/Simulink modeling for integration with dSPACE Configuration Desk
- Test Scripts using VB Scripts in ProveTech with dSPACE HIL platform.
- Writing Test Specification and implementation of test scripts

## 3. Project Title: Test Bench Validation of Advanced Camper Unit ECU

**Team Size:** 4

Mercedes Benz

**Role:** Test Engineer

### Highlights:

- Writing Test specification for Camper vans features
- Performing Manual tests to validate ACU Software
- Ensure to deliver test specifications for vehicle testing

## 4. Project Title: Test Management for Door module ECU validation

**Team Size:** 13

Mercedes Benz

**Role:** Test Management

- Led end-to-end validation activities for Door Module ECU (Window Lifter, Central Locking, Mirror Control, Child Lock functions)
- Defined validation strategy and test coverage based on system requirements and BROP levels.
- Supervised dSPACE HIL (SCALEXIO) test execution using ProveTech/ControlDesk.
- Managed test planning, scheduling, and resource allocation for HIL-based validation.
- Led a team of 13 validation engineers, assigned tasks based on project requirements, and monitored overall work progress to ensure timely delivery

## 5. Project Title: Defect Manager for Automatic Door (AD) ECU validation

Mercedes Benz

**Role:** Defect Management

- Managed end-to-end defect lifecycle for AD ECU validation
- Performed initial impact analysis and severity classification
- Monitored defect aging and ensured adherence to SLA timelines.
- Conducted defect triage meetings with cross-functional teams (System, Software, Integration, Validation)
- Performed root cause analysis (RCA) for critical issues and ensured corrective actions

## TECHNICAL SKILLS

**Embedded Testing:** System Testing, Black Box Testing, Regression Testing, HIL Testing, ADAS, SIL Testing, Automation, dSPACE, MATLAB

**Programming Languages:** C

**Scripting Languages:** VB Script, CAPL

**Communication Protocols:** CAN and UDS

**Tools:** Vector Canoe, RTC, Putty, VTD, RQM, JIRA, PREEvision, ProveTech, MATLAB

**Others:** Agile Scrum methodology, Leadership
